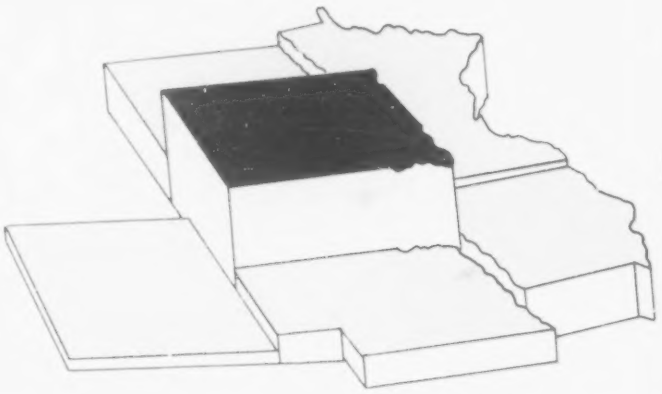
SOUTH DAKOTA Data Supplement

November 1987
Vol. IV, No. 5



Published by Business Research Bureau, The University of South Dakota

* STATE'S BIMONTHLY RETAIL SALES PERFORMANCE FOR JULY-AUGUST LAGGED THE NATIONAL GROWTH RATE FOR FIRST TIME IN OVER A YEAR

* SALES SHOWED GROWTH OF 4.3% IN COUNTIES OF TOP TEN CITIES

* RURAL COUNTIES' RETAIL SALES STAND FIRM AT 4.5% FOR TWO BIMONTHLIES

By Randall M. Stuefen

National retail sales exceeded the state growth rate of 4.3% for the first time in over one year. However, the performance of South Dakota retail sales remains respectable and continues to exceed the under 4% forecasts of the state's economists. The unusual characteristic of this period is the sales performance by segment. The counties of the largest ten cities in the state did not outperform their more rural neighbors. The double digit performance levels associated with the urban counties have not escaped their grasp for two bimonthlies in a row.

The lack of zest in the top ten cities does not appear to result from the consumer abandoning retail establishments. The performance by SIC segment showed department store sales growth of 8.5%, food was up 6.3%, apparel and accessory increased 7.1%, furniture gained 16.5%, and eating and drinking 4.0%. The service industry also showed gains with hotels and motels gaining 8.8% and personal services such as laundry, hair care, photographic studios and shoe repair up 9.1%. Motion picture sales and amusement receipts were up 21.6% and 9.7%, respectively.

The sectors that dampened growth for the top ten counties impacted the growth throughout the state. An outstanding performance report was held back by negative performance in the building materials sector and in two sectors that are not usually thought of as components of retail trade: wholesale durable goods and wholesale nondurable goods. Statewide, building materials were down 4.5%, wholesale durable goods dropped 6.3% and wholesale nondurable goods were off 7.3%. These sectors are large and swings in performance have significant impact. For perspec-

tive, combined taxable sales for the three categories this reporting period exceeded 120.7 million dollars. Total statewide taxable sales for the bimonthly period were 736.7 million dollars.

Brookings county was the performance champ of the top ten counties with an increase of 13.3% with Yankton county close behind at 11.1%. The county with the most surprising performance was Pennington with a loss of 0.2%. It is a surprise in that tourism was reported as being exceptionally strong. However, most sectors were sluggish and more than offset by a declining building materials sector and wholesale trade durable's sector. The taxable sales on wholesale trade durables decreased over 33% this period from an unusually high 12.5 million dollars to 8.2 million dollars.

The more rural neighbors, counties other than the top ten, maintained a 4.5% rate of growth. While these counties shared in the same weak sectors identified for the top ten, they also shared in the strengths throughout the other sectors. This bimonthly marks the third bimonthly in a row of reasonable strength for these counties.

The national retail sales increased at the rate of 1.5% in the September-October bimonthly period. The national index of consumer sentiment decreased slightly from 93.7 in May to 93.6 in September. The impact of stock market's "Black Monday" should show in the index of consumer sentiment by the next reporting period—if there is an impact.

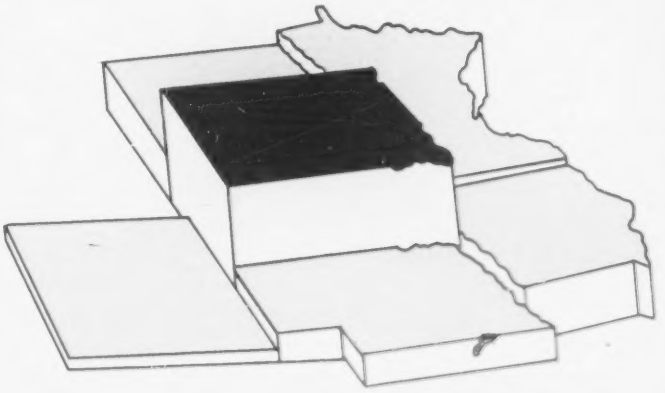
SOUTH DAKOTA Data Supplement

January 1988
Vol. IV, No. 6



Published by Business Research Bureau, The University of South Dakota

* STATE'S RETAIL SALES PERFORMANCE FOR SEPTEMBER-OCTOBER BIMONTHLY 5.7 PERCENTAGE POINTS AHEAD OF THE NATION'S INCREASE OF 1.5%

* TOP TEN COUNTIES' RETAIL SALES WERE UP 5.4% FOR THE PERIOD

* RURAL COUNTIES HAVE THEIR BEST BIMONTHLY RETAIL SALES REPORT EVER

Randall M. Stuefen

The national retail sales growth rate slowed to an anemic 1.5% in the September and October bimonthly. If one looks to performance in November-December to complete the national Christmas season report, the season was a disappointment. The national growth rate for the November-December bimonthly fell to 1.3%. A number of problems exist for expanded retail sales growth in the near future. Consumer savings is low. Consumer debt is high. Growth in personal income is slow and the consumer lacks confidence following the stock market crash.

South Dakota differs from the nation in that it has been in a period of readjustment for four or five years. In 1983, the farmer's wealth position was decaying because of falling land values. Farm income was below trend and many of the state's farmers were heavily in debt. The retail community shared in the misfortune of the agricultural sector through sluggish sales. The more rural, less diversified communities were affected to a greater degree because of their agricultural dependency. The more diversified economies are the more urban economies and they benefited from the positive offsetting influence of a national recovery.

A supportive farm program, stablizing land values, relatively good livestock prices and a good harvest strengthened the retail sales of the more rural communities in 1987. Growth has been reported in four of five reporting periods of 1987. In the September-October bimonthly, the rural retailers' sales performance dramatically out paced the more urban communities. This period's 12.0% growth rate is the highest reported for this group since bimonthly reporting started in 1983. That growth was general across all but a couple of sectors. Apparel and accessory sales and motion picture attendance sales were down. Building material sales increased by less than 1.0 percent.

Trends in the South Dakota Economy

By Ronald Johnson

The four graphs below provide information about real personal income in South Dakota and in the U.S., the change in the farm sector's contribution to South Dakota personal income and the change in the level of non-agricultural employment in South Dakota and the U.S. The first graph compares South Dakota real personal income with a trend line, computed by using data from the First Quarter of 1958 through the Fourth Quarter of 1979. This trend line shows a 3.3% per year growth rate in South Dakota real personal income for that period. Beginning in the First Quarter of 1979 and continuing to the present, real personal income in South Dakota has consistently been below the previously established trend line. Real personal income declined in 1985, but showed significant gains in 1986. Data for the First Quarter of 1987 shows a decline to the $7.5 billion level, but above the low seen in the Second Quarter of 1986.

The second graph compares real personal income in South Dakota with real personal income in the U.S. Real personal income in the U.S. has shown consistent, overall growth for the period 1975 to 1987, as compared to the volatile, although increasing, real personal income in South Dakota. After peaking in the First Quarter of 1986, real personal income in South Dakota has returned in the First Quarter of 1987 to the level seen in the Third Quarter of 1986.

The percentage of South Dakota total personal income derived from the farm sector is presented in the third graph. The approximate 40% decline occurring in 1974, has not been regained. The average percentage of South Dakota personal income derived from the farm sector was 19% for the period 1958 to 1974, as compared to 9% for the period 1975 to 1987, a decline of 53%. After a relative high of about 16% in 1986, the farm sector percentage declined to its current level of about 10%.

The last graph compares South Dakota non-agricultural employment with U.S. non-agricultural employment. After a low point in 1982 U.S. non-agricultural employment has shown steady growth. South Dakota non-agricultural employment has also shown growth, although a leveling off occurred in 1984 and the first part of 1985. South Dakota non-agricultural employment during the First Quarter of 1987 showed a decline to the level of the Third Quarter of 1986 of approximately 254,000 persons employed.

Continued from page 1.

The counties of the top ten cities experienced strong double digit growth in the areas of general merchandise and food sales. All segments selling "goods" showed positive growth. The building materials segment was near stagnant at a positive 0.3%. Services were positive with the exception of the automotive repair, miscellaneous repair, and legal services. Hotels and other lodging places reported a very strong 17.8% growth.

As cited above, national retail sales increased at the lackluster rate of 1.3% in the November-December bimonthly period. The national index of consumer sentiment decreased dramatically this bimonthly from 93.6 in September to 83.1 in November. October 19th's "Black Monday" in the stock market has taken a toll in consumer confidence and has dampened retail sales, but no catastrophy occurred in either measure.

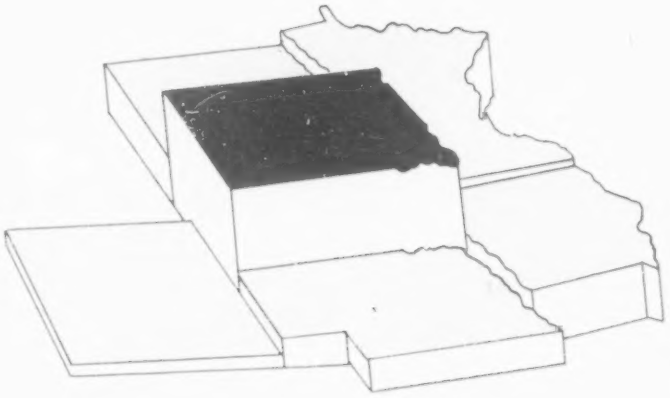
SOUTH DAKOTA Data Supplement

March 1988
Vol. V, No. 1



Published by Business Research Bureau, The University of South Dakota

* STATE'S RETAIL SALES PERFORMANCE FOR NOVEMBER-DECEMBER BIMONTHLY, THE CHRISTMAS BUYING SEASON, WAS UP 6.6%

* TOP TEN COUNTIES' RETAIL SALES INCREASED 7.3%

* RURAL COUNTY RETAIL SALES CONTINUE TO PERFORM WITH GROWTH OF 4.7%

National retail sales for the Christmas reporting period were a less than impressive 1.7%. South Dakota's statewide November-December bimonthly sales increased 6.6%. The state's rate of increase compared to the national growth rate is nearly four-fold. The dampening effect of the stock market crash remains evident at the national level. The effects of an improved agricultural condition on South Dakota sales is evident by continued growth in the more rural counties.

Retail sales in the more rural counties increased 4.7%. That marks the fifth consecutive bimonthly period of growth. Building material sales rebounded from two bimonthlies of poor performance with a growth rate of 13.6%. General merchandise sales were up 9.3%. That is noteworthy growth, but not up to the year end average gain in 1987 of 10.4% for the category. Lodging, personal and business services were all strong with growth rates of 13.2%, 8.0% and 46.6%, respectively. The hotel and motel sector scored its second consecutive large increase. November-December sales were up 13.2%. Personal services increased 8.0%. The personal services category includes barbers, beauticians, portrait studios, dry cleaners and shoe repair. Business services were up 46.6%.

In the more urban counties, building materials scored a less impressive gain of 3.3% as did general merchandise with reported growth of 6.5%. The sale of merchandise lost momentum this bimonthly. The greatest gains were in the service sectors. The hotel and motel sector scored its second

large increase. September-October sales were up 17.8% and November-December sales were up 20.9%. Personal and business services were both strong with growth rates of 9.3% and 13.1% respectively.

Merchandise Retail Sales in 1987

Of the top ten counties, Hughes county made the greatest gain in the sale of merchandise in 1987. Sales in the county were up 10.1%. Minnehaha placed second with an 8.3% increase in 1987 over 1986.

Service Retail Sales in 1987

Codington county made the greatest stride in the sal of services of the top ten counties in 1987. The sale of services increased 16.9%. Brookings county experienced the second largest growth rate in the service area. Brookings sales were up 10.3%.

Congratulations Minnehaha Retailers!

The milestone of a billion dollars in retail sales has been achieved in Minnehaha county. The total retail sales in Minnehaha in 1987 was 1,064,507,000 dollars. The 1987 sales were up 7.8% over the same figure for 1986.

The January index of consumer sentiment rebounded from a stock market crash low of 83.1 to 90.8. National retail sales in January-February increased along with the consumer sentiment index. Retail sales for the first two months of 1988 were up 5.4%. Much of that increase is being attributed to heavy sales of automobiles.

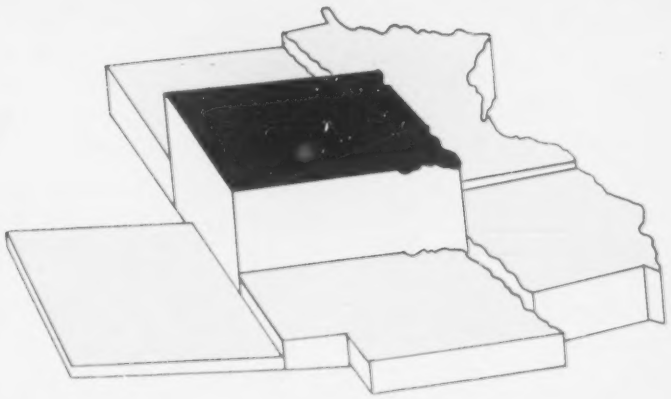
SOUTH DAKOTA Data Supplement

May 1988
Vol. V, No. 2



Published by Business Research Bureau, The University of South Dakota

* STATE'S RETAIL SALES PERFORMANCE IN JANUARY-FEBRUARY BIMONTHLY IS UP 5.2% OVER THE SAME PERIOD IN 1987

* TOP TEN COUNTIES' RETAIL SALES INCREASE IS 3.8%

* RURAL COUNTIES' RETAIL SALES OUTSHINE THE TOP TEN AND THE NATION WITH A 9.0% GROWTH RATE

National retail sales pick up after two slow reporting periods. The nation's consumer confidence, as measured by the national index of consumer sentiment, continues to recover from the October, 1987 stock market crash. South Dakota's statewide retail sales increased 5.2%. The state lagged the national growth rate for the period by 1.2 percentage points.

The top ten counties' growth rate was the weakest of the urban-rural reporting groups. Brown county's performance was the weakest with a decline of 7.7%. Pennington county also performed poorly with a growth rate only .4% above the preceding year. In both counties, the sale of services was positive. The sale of tangible personal property declined a great deal in Brown county and slightly in Pennington. Pennington's increased sale of services offset the decline in the sale of personal property.

The rural counties had another good bimonthly reporting period. In the last six months, these counties have reported increases of 12.0%, 4.7% and 9.0%. The increase is comprised of a solid rate of increase in the sale of goods and a very strong rate of increase in the sale of services. Building material sales were down 3.0%. However, general merchandise was up 2.9%, food sales were up 2.4%, furniture was up 7.6% and miscellaneous sales were up 11.8%. Miscellaneous sales include those at drug stores, sporting goods, book, jewelry, camera stores, bakery and florist shops. The most significant gain in the services sector was in business services.

The March index of consumer sentiment continues to rebound from the stock market crash low of 83.1. The March index is 94.6. National retail sales in May-June were up 5.8%.

Trends in the South Dakota Economy

by Guy Childs

The graphs below present data showing the economic trends in the United States and South Dakota through 1987. Generally, South Dakota real per capita personal income follows the trend set by the United States, although a variation did occur when South Dakota real per capita personal income rose above that of the United States in 1973 and 1974. Prior to and following 1974, South Dakota has been below the United States real per capita personal income, while the trends appear to be similar.

From 1958 to 1976, real per capita personal income grew at an annual rate of 4.3 percent per year. Since 1976, the average growth rate slowed to 1 percent per year. During this period, it has increased to its current level of approximately $11,200 per capita.

The trend of the unemployment rate in South Dakota is consistent with that of the United States, except for fluctuation from 1984-1985 in South Dakota, when United States unemployment remained relatively stable. Another inconsistency between trends occurred in 1987 when South Dakota's unemployment rate rose from 4 percent to 4.6 percent, while United States unemployment slightly decreased to just below 6 percent.

The percent of personal income in South Dakota derived from the farm sector decreased dramatically from approximately 33 percent in 1973 to a low of -1 percent in 1983. Since 1986, the percent of personal income in South Dakota contributed by the farm sector has been consistently above the computed trend line of 8.3 percent for the period 1976-1987.

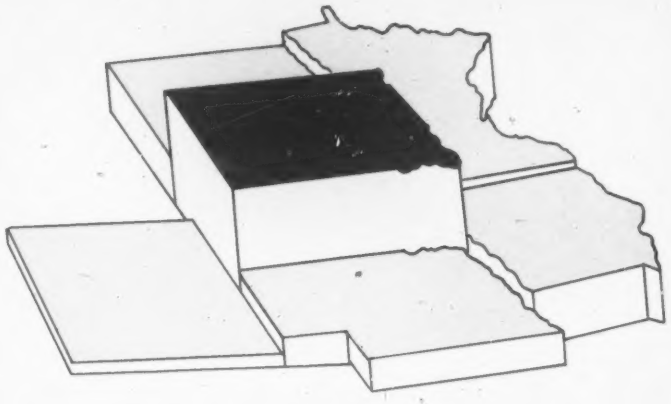
SOUTH DAKOTA Data Supplement

July 1988
Vol. V, No. 3



Published by Business Research Bureau, The University of South Dakota

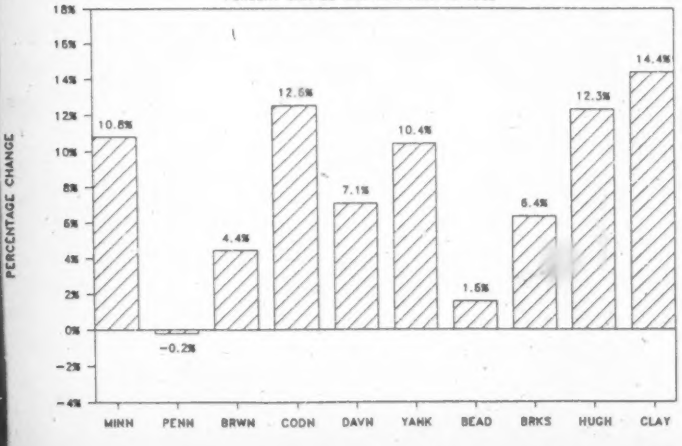
* SOUTH DAKOTA RETAIL SALES INCREASE 7.5% IN MARCH-APRIL BIMONTHLY
* RENEWED STRENGTH FOR COUNTIES OF THE TOP TEN CITIES
* CONTINUED RETAIL SALES STRENGTH IN THE MORE RURAL COUNTIES

South Dakota's retail sales rose from 5.2% last reporting period to 7.5% in the March-April bimonthly. The state's growth rate exceeds that for the national growth rate of 5.8% by 1.7 percentage points. Retail sales of construction materials were 15.2% lower than for the same period in 1987. Taxable retail sales at the wholesale trade level were strong with gains of 13.6%. The sale of tangible personal property through retail outlets increased 8.8% and the sale of services expanded 9.7%.

The increase for the counties of the largest ten cities averaged 7.0% for the two-month reporting period. Individual county performance varied widely with the largest increase (14.4%) in Clay county and a decrease (−.2%) in Pennington county. Clay county was exceptionally strong in the two major retail sale components of goods (12.9%) and services (19.8%). That exceptional performance overshadowed poor performance in the areas of construction (−32.8%) and manufacturing (−7.9%). Pennington county had tremendous growth in this period a year ago (16.2%).

SELECTED TAXABLE RETAIL SALES

PERCENT CHANGE MAR–APR 1987 TO 1988



In light of last year's performance, Pennington retailers had reasonable gains in the sale of goods (5.7%) and services (5.8%). Construction, manufacturing and utilities were the weaknesses in Pennington's retail sales sectors.

The counties, other than the top ten, outperformed their larger neighbors. Retail sales increases for the more rural counties averaged 8.8%. That is only 0.2% lower than last bimonthlies' performance and is the third outstanding reporting period in the last four. Mining (26.3%), manufacturing (46.3%) and wholesale trade (16.4%) were the extremely strong performers. The sale of goods (7.2%) and services (8.4%) were both close to the average performance for the state. Construction receipts (−33.3%) were the poorest performer for this group this bimonthly.

National retail sales increased at the rate of 5.4% for the May-June bimonthly—down 0.4 percentage points from the March-April reporting period. The national index of consumer sentiment for the period increased from 94.6 in March to 94.8 in May.

BIMONTHLY PERIODS	MAY-JUN 1987	JUL-AUG 1987	SEP-OCT 1987	NOV-DEC 1987	JAN-FEB 1988	MAR-APR 1988
NATIONAL RETAIL SALES (1)(2)	5.0%	5.5%	0.5%	1.7%	6.6%	5.8%
NATIONAL INDEX OF CONSUMER SENTIMENT (2)(3)	91.1	93.7	93.6	83.1	90.8	94.6
SO. DAK. RETAIL SALES (5)	5.2%	4.3%	7.2%	6.6%	5.2%	7.5%
COUNTIES OF LARGEST TEN CITIES (4)(5)	5.4%	4.3%	5.4%	7.3%	3.8%	7.0%
ALL OTHER COUNTIES (5)	4.5%	4.5%	12.0%	4.7%	9.0%	8.8%
